

Policy Statement

Westinghouse will design, source, produce, market, and deliver our products and services in a safe, reliable, environmentally sound, and socially responsible manner. Westinghouse expects every employee, and any person working on behalf of Westinghouse, to understand their role and participate in the implementation of our Quality, Environment, Health, and Safety (QEHS) programs and processes.

Westinghouse is committed to:

- Providing a safe and healthy work environment by preventing work-related accidents and occupational illnesses, targeting zero harm.
- Identifying and managing QEHS hazards, aspects and risks and implementing effective plans to eliminate or minimize those risks.
- Reducing our environmental impact by minimizing greenhouse gas emissions, raw material and energy usage, and preventing pollution by reducing waste, recycling and reusing materials and resources.
- Ensuring conformance with all applicable legal and other compliance obligations and requirements.
- Continual improvement of the management system to ensure alignment with the purpose and context of the organization and to support its strategic direction.
- Fostering a culture of QEHS awareness, consultation, participation, and accountability with all our employees and other interested parties.
- Recognizing the special characteristics of nuclear technology and ensuring that activities involving nuclear materials are performed in a manner that ensures that nuclear safety is not compromised by other priorities.
- Setting meaningful, realistic objectives to continually improve our QEHS performance.
- Utilizing qualified and competent resources to implement and maintain our QEHS programs.
- Maintaining a work environment where employees are encouraged to openly express concerns about the safety and quality of our products and services.

Responsibility

It is the responsibility of all employees and any person working on behalf of Westinghouse and its subsidiaries/joint ventures to read and comply with the provisions of this Policy.

Patrick D. Fragman
Chief Executive Officer
Westinghouse Electric Company
